## Vande Bharat Express: Pioneering India's High-Speed Rail Journey

The Vande Bharat Express, also known as Train 18, is an Indian semi-high speed intercity electric multiple unit train. It was designed and developed by the Integral Coach Factory (ICF) in Chennai, India. The solution focuses on implementing and solving for solutions to identify the train name, train number and the number of cars available involving to find the distance by the train and its average occupancy for statistical purposes and better performance of the Express.
